# ***DER SEMINAR SCHEDULE FY 96***

## **STANDARDIZATION AND RECURRENT**

**DESCRIPTION:** The DER Standardization Seminar is a two day seminar that discusses FAA's certification authority; FAA organization; DER authority; DER responsibilities; certification of aircraft and aircraft products; and continuing airworthiness.

The DER Recurrent Seminar is a one and one half day to two day seminar. General topics of choosing by the host ACO are presented the first half day of the seminar. General topics include such topics as changes in rules and guidance; conformity requests, DER oversight; DER handbook changes, current PMA procedures; and DER involvement in Field Approvals. The remainder of the DER Recurrent Seminar consists of the presentation of technical topics such as software conformity, lightning zone definitions, crack growth analysis, comparative analysis, damage tolerance repairs, and preparation for performing certification tests by the host ACO engineers.

**REGISTRATION:** For FY 96 the host Aircraft Certification Office (ACO) sends AFS-610 the mailing labels and AFS-610 mails the invitation letter to the DERs with instructions to contact the AFS-612 seminar manager by telephone or FAX number shown in the letter to enroll in the DER Seminar. A DER whose delegation is authorized by an ACO other than the host ACO must contact AFS-610 for an invitation letter and to enroll in a DER seminar.
